Clarity 26 with River Washed log set

Clarity 26 with In The Woods firebox inset

CLARITY 26

FREESTANDING STOVE

Design

Our unique "infinity flame" is created by the use of a black glass floor, mirrored glass sides, and a sand dune rear panel. You can choose this modern look or further enhance the flame by choosing a traditional log set or customize your own inset design.

Function

The CL26 is available with standing pilot* or intermittent pilot (IPI) with thermostat remote control functions. The large glass area is 21" x 18". At 27,000 BTU's the CL26 is a great heater. Our crescent shaped burner system has a 50% heat turn down allowing you to control the heat and the look of the flame. An optional fan system is available to help move the warmth throughout your home.

*Standing Pilot System not available in some areas, check with your local dealer.

Clarity 2118 with with shroud for hearth mount install

CLARITY 2118

FIREPLACE

Design

The Clarity 2118 is designed to fit into a modern home where space is a premium. It can be installed like a traditional fireplace or raised higher in a wall. Decorative options include a choice of river washed logs or custom insets that make this fireplace uniquely yours.

Function

The CL2118 is available with standing pilot* or intermittent pilot (IPI) with thermostat remote control functions. The fireplace has a large viewing area, 21" x 18", and 27,000 BTU's of available heat. Our crescent shaped burner system has a 50% heat turn down. An optional fan system is available to help move the warmth around your home.

*Standing Pilot System not available in some areas, check with your local dealer.
