Clarity 2714

Gas Fireplace Insert

Blaze King

An insert with interchangeable options

◉ **Design** The Clarity CL2714 is a versatile insert that lets you choose from many options to suit your style. Whether you want a classic look with a hardwood log set and brick liner, or a sleek look with reflective black and mirrored glass, you can make it happen. You can even personalize your design with your own artwork. For example, check out our exclusive Christmas Village, a colorful glass artwork for the rear firebox, on the page 4. The options include 2 types of ceramic logs, ceramic brick liners, black and mirrored glass options, 5 shroud sizes, 2 shroud bases, 3 mantle shields, 2 gas types (NG or LP), a fan option, and a smart home kit option. With so many possibilities, you can create the perfect performance and design for your home.

Unlike other manufacturers, we use a heavy gauge steel construction in all our inserts. When you purchase a Blaze King product you know it is built to last.

◉ **Radiant Heat Versus Convection Heat** The CL2714 gives you the feeling of a real fire with radiant heat. Radiant heat is like the sun, it warms up objects. The CL2714 has a very large glass area that lets more radiant heat into the room. The glass area is 27" x 14", which is one of the biggest you can find on a medium sized insert. And the best part is, it can fit into a 30" wide fireplace.

CL2714 with 32" x 44" trimmed to fit shroud, traditional log set and red brick liner

Convection heat is when you heat the air. The optional fan system, on the CL2714 moves room air over the hot surface of your fireplace insert and circulates it evenly around your home.
